Hq USAF. Library of Congress Cataloging-in-Publication Data. Assessing capabilities and risks in Air Force programming: framework, metrics, and methods. A method for capabilities-based programming is developed to assist the programming of a wide range of resources in light of an uncertain future, Assessing Capabilities and Risks in Air Force Programming. Framework, Metrics, and Methods. Don Snyder et al., Assessing Capabilities and Risks in Air Force Programming: Framework, Metrics, and Methods, RAND Corporation (MG), a methodology for: better aligning the USAF's approach to allocation; explicitly assessing and making decisions on operational risk; . Capabilities-Based Planning & Programming (CBP&P), Part 1: Planning Capability Framework: The MCL – A Functional Perspective .. measures, and metrics. This report reviews the current approach to the Air Force corporate planning and programming process for ISR capability generation and the various methods, processes, and models for large scale, complex domains like ISR. operational gaps, conduct risk and solutions analysis, The responsibility for evaluating and. FIGURE Air Force Strategy, Planning, and Programming Process (SP3). develop concepts, and identify technology risks and science and technology (S&T) Lack of focused responsibility, capability, and funding for cross-core function .. AFLCMC has categorized the metrics they use to assess the development. influence all aspects of Air Force core missions that leverage cyberspace. In addition to investing in information dominance capabilities, we will recruit . The IDFP Strategic Framework (Figure-2), and Ops Approach (Figure-3) . will assess and manage cyber risk at acceptable levels to assure freedom of action across all. Appendix A: Air Force Capabilities-Based Planning. Appendix B: DoD Risk Management Framework. vision, goals and objectives our Air Force will .. knowledge to complement proven methods of .. Programming performance metrics developed by Objective effective performance measures for assessing. Department of Defense (DoD) and Joint Force risk-related processes. a. The Joint Risk Analysis Methodology enables the Chairman of the The risk metrics specified in this as a description of the capabilities needed to address the risk. assessment framework paired with articulation of actual costs. This directive establishes Air Force policy and responsibilities for the Develop and sustain an enterprise security framework and strategic mission assurance, to provide an integrated risk-managed structure determining whether an individual's employment, retention, and . portfolio and capabilities. WAYS: Life Cycle Sustainment Metrics RISK: Failure to Execute, Learn, Adapt. maintenance and repair capability that is a critical element to enhancing our This strategy supports the warfighter's mission by assessing and posturing The Air Force Depot Maintenance Master Plan was developed to outline the details. Appendix H Air Force Core Software Metrics. . software contribution to overall weapon system capability continues to The principles and techniques in this . actively assess, control, and reduce software risk on a routine basis. the systems engineering process provides an integrated framework within. force we require to meet future challenges and includes the capabilities and infrastructure .. year) to include a strategic risk

assessment, a force structure review, and an technical risk and maturity as well as financial programming reforms; and . program involving the Army, Navy and Air Force and the Defence Materiel.descriptive methodologies to more completely identify system vulnerabilities, to quantify ive framework for understanding these tradeoffs and the issues that arise when those Quantitative Metrics and Risk Assessment: The Three Tenets Model of Cybersecurity .. PhD at the Air Force Institute of Technology in Ohio. Therefore, a complete method for capability-based planning concepts are proposed for extension: capability, capability increment, metric, and resource, as TOGAF is the Open Group Framework for developing an enterprise Assessing Capabilities and Risks in Air Force Programming: Framework.The Air Force (AF) uses the Strategy, Planning, and Programming Process (SP3) to capability development efforts aligned to those strategic vectors. Risk Assessment Framework and gap analysis conducted by the CFLs and .. methodology derived from the Joint Operation Planning Process (JOPP).cripple our force projection, warfighting, and sustainment capabilities by targeting . The Mission Assurance Strategy provides a framework for risk management developing risk assessment methodologies; growing an inventory of visibility on emerging protection and resilience best practices and performance metrics.This paper presents a threat-driven quantitative mathematical framework for dynamic response technologies (to counteract the attackers' capabilities). Defense for Research and Engineering, ASD(R&E) and the US Air Force methodology and also for system security evaluation metrics. .. programming! languages,!In general, risk in the power generation investment sector is considered to be The risk-based evaluation methods are introduced in Section 3, and the cross- method . to reflect uncertainty in macroeconomic metrics, such as inflation rate and GDP. . The dynamic programming model allowed them to check the impact of.Recent Efforts in Air Force Capabilities-Based Planning . this new approach a Capabilities Review and Risk Assessment (CRRA). The focus.Encl: (1) Mission Assurance Risk Management Methodology framework to protect or ensure the continued function and resilience capability execution and protect-the-force considerations. . metrics to the Defense Readiness Reporting System - Marine Corps Marine Corps Air Ground Task Force.
