

Designing A User Study: General Research Design

Sample	Probable Bias	Reason
Your Customers	Favorable	They would not be your customers if they were unhappy, but it is important to know what keeps them happy.
Your Ex-Customers	Unfavorable	If they were happy they would not be ex-customers, but it is important to know why they left you.
"Phone-In"	Extreme Views	Only people with a strong interest in a subject (either for or against) are likely to call in - and they may do so several times to load the vote.
Daytime	Non-Working	A majority of people who are at home during Interviews the day do not work. Their opinions may not reflect the working population.
Internet	Atypical People	Limited to people with Internet access. Internet users are not representative of the general population, even when matched on age, gender, etc.. This can be a serious problem, unless you are only interested in people who have Internet access. In many business surveys this limitation might not be a problem. Another concern is that respondents have been known to complete multiple surveys to sway results, unless the software prevents this.

4 days ago The case study research design is also useful for testing whether a . to more quantitative research designs with the general overview giving Design Flaws to Avoid - Independent and Dependent.
